Summary

Senior Mobile Application Developer and Team Lead with 5+ years designing and shipping production-grade cross-platform applications using React Native, Next.js, and Angular. Expert in JavaScript and HTML5 with a focus on front-end performance optimization, UI/UX feasibility assessment, and API design and integration. Proven track record delivering software across healthcare, logistics, fintech, ride-hailing, e-commerce, facilities management, retail POS, and AI-powered surveillance systems. Skilled in technical leadership, system architecture, and end-to-end delivery of App Store and Google Play products.

Work

Team Lead Mobile Applications

Dec 2023 – Present

VirtueXolutions • Karachi, Pakistan

- Led React Native engineering teams across multiple client products, owning system architecture, sprint planning, code reviews, and production releases; drove front-end performance optimizations and consistent JavaScript architecture across apps.
- Coordinated directly with stakeholders and designers to validate UI/UX feasibility and deliver solutions for logistics, retail POS (Angular/Electron), AI surveillance, and enterprise mobile systems.
- Mentored developers and established JavaScript coding standards, CI-ready workflows, and scalable project structures to improve team output and code quality.

Senior React Native Developer

Dec 2022 – Dec 2023

VirtueXolutions • Karachi, Pakistan

- Designed end-to-end application architecture and API integrations, optimizing front-end performance and shipping multiple production-grade mobile products from concept to release.
- Integrated payment gateways, real-time chat, live streaming (Agora), and mapping solutions via third-party APIs and SDKs.

React Native Developer

Mar 2022 – Dec 2022

TAFSOL • Karachi, Pakistan

- Built cross-platform fintech, healthcare, multilingual, and e-commerce applications using React Native, implementing UI/UX feasibility feedback and performance improvements.
- Implemented Firebase authentication, push notifications, and third-party API integrations to support core product features.

Associate Developer

Nov 2020 – Feb 2022

SAS Solution • Karachi, Pakistan

- Progressed from intern to professional developer.
- Contributed to hybrid mobile application development (HTML5/JavaScript) and long-term maintenance.
- Supported production maintenance and release activities for client applications.

Project

AI Surveillance System

- Computer-vision-based intelligent video monitoring system deployed in production at California and Broadway venues, supporting enterprise surveillance workflows.

Order Intel POS (Angular, Electron)

- Multi-brand point-of-sale frontend built for Costa Coffee, Broadway, and California, designed for Electron-based Windows EXE packaging.

FleetEx Logistics (Next.js)

- International freight and supply chain company website.

Rapid Express Logistics (Next.js)

- Domestic and international logistics platform with an integrated client portal.

LookClean

- Barber booking and e-commerce mobile application, live on the App Store and Google Play.

Facilitate

- Facilities and work-order management mobile application, live on the App Store and Google Play.

RideLynk

- Ride-hailing platform with separate User and Rider apps, featuring real-time tracking and in-app payments, published on Google Play.

Daweeye

- Multilingual healthcare and hospital management platform.

HatchSocial

- Social networking application with real-time chat and live streaming, built using Agora and CometChat.

Indoor Positioning App

- BLE-based indoor navigation application developed for shopping malls in Dubai.

EndorseMe

- US-based freelance marketplace platform.

Education

Bahria University, Karachi Campus

Computer Science | BS

GPA: 3.2

Skills

Languages & Frameworks

React Native, TypeScript, JavaScript, React.js, Next.js, Angular, Redux Toolkit, Electron

Backend & Integrations

REST APIs, Firebase, Authentication, Firestore, Push Notifications, Payment Gateway Integration, Google Maps API,

Agora SDK, CometChat

AI & Domain Expertise

AI / Computer Vision Surveillance Systems, Enterprise Retail POS, Logistics Platforms, Healthcare Workflow Systems

Tools & Practices

Git, GitHub, Android Studio, Xcode, Agile / Scrum, CI/CD-ready Workflows, Vercel,

Mobile App Deployment (iOS & Android), Browser rendering behavior & front-end performance optimization
